LabRequest: trusted metadata
User: alice | Project: polymer-study | Resource: tensile-01
2026-10-15, 10:00-11:00
Request text: Reserve tensile-01 for polymer-study from 10:00 to 11:00
Model: ToolCallDecision, steps 1-4
1. search_lab_documents | 2. get_user_authorizations
3. get_resource_status | 4. reserve_resource
Action gate before every dispatch
Validate arguments and bind them to the request
Reservation: all 10 policy facts true; no prior successful mutation
ToolEnvironment / LabSimulator
Run the permitted tool with the checked arguments
Next decision sees observation
ToolObservation: ok=true
Policy retrieved; Alice authorized and trained
tensile-01 available, calibrated, no maintenance
Step 4: confirmed reservation with a new ID
Trace and updated messages
Append each decision and observation
4 trace events; only step 4 is mutating
Model: FinalDecision, step 5
status: completed | completed_actions: reserve_resource
citation: TRN-210#tensile-tester
Evidence
Validate final response against trace
Citation was retrieved; claimed reservation succeeded
AgentRun: The reservation was created.
termination_reason: model_finished
